## Starting work on Luleå building 2

den 7 mars 2014 kl. 10:30

It's been less than a year since we first started serving traffic from our Luleå data center; one of the greenest, most cutting-edge facilities of its kind in the world.

We are proud of the technical and environmental innovations being pioneered here in the north of Sweden. And we are just as proud of the friendships we have forged with the local community. Most of our 90+ permanent staff and many of the 800 people who have worked on the site at different times are from the Luleå area.

But doesn't expect to use it in the near future

**G**oogle has bought 109 hectares of land in the Avesta municipality in the Dalarna region of Sweden, 160 kilometres north-west of Stockholm.

The company, which is rapidly expanding its European data center presence both for internal use and for Google Cloud, said that it acquired the land as a potential data center location, but has no immediate plans to use it.
